

FAQ 16.12.2020

Why has the health protocol been upgraded to Level 3?

The Level 3 Sanitary Protocol concerns a very active, localized circulation of the virus, requiring the implementation of distance learning for Collège and Lycée in a given geographical area. For information, as of December 11, LFSL did not have any cases of students testing positive for Covid-19. Nevertheless, the recommendation taken by the authorities of Smittskydd Stockholm is binding for all secondary schools in Stockholm.

Why did you distance all levels of the college?

The measure taken by the Swedish authorities on Friday concerns the Högstadieskolorna that we can translate by the College level. According to the Högstadieskolorna it can concern students from 5e to 3e and sometimes 6e grade. The Collège level at LFSL being from 6e to 3e, it is these 4 levels which are passed at a distance. The aim of the recommendation is to enable staff and students to work at a distance in order to limit the number of gatherings and the use of public transport as much as possible.

How is distance learning going to work in practice?

Everything is indicated in <u>Health and pedagogical protocol</u> that was validated at the beginning of the school year. Distance learning has already been in place for a few weeks on the Lycée part. Teachers, students and families are required to refer to this protocol. All courses and homework will be indicated via Pronote. Each teacher will make at least one visual contact per week with his or her classes on a slot in the discipline's timetable via Teams only. Teachers are available on the subject slots in the timetable to answer students' questions. The teacher keeps his pedagogical freedom in the organization of the lessons.

What is the role of parents in distance education?

Everything is specified in the pedagogical protocol. Parents have access to all courses and homework via their Pronote account. They can therefore follow up on their child's work.

Is it possible to borrow a computer for distance learning?

Yes the school can provide a computer. It is important that the requests correspond to real needs so as not to deprive a family that would have no other alternatives. We have received many requests and loans will only be made within the limits of available stocks.

Furthermore, it is important that in the case of a return to the classroom, the computers are returned the same day so that they can be used for educational purposes..

What are the forecasts for the beginning of January regarding the recovery?

In view of the changing health situation and the Swedish recommendations for schools issued until January 6, 2021, we cannot provide further details at this time. We will keep you informed in early January (around the 4th or 5th) whether or not distance learning will be extended. In any case, it is important that students be ready to work from January 7, 2021 for either distance or in-class teaching.

Will it be possible to contact the establishment during the Christmas vacations?

Elémentaire and Secondaire will be closed during the Christmas vacations. No permanence will be assured during this period. Your requests will be processed as of January 4, 2021.
