Subject: Message from the Headmaster - Protocol level 02 – update 09/11/2020

Madam, Sir,

You are informed of the implementation of level 2 of the Health and Pedagogical Protocol as of this Monday, November 09, 2020 at 8:00 am.

As the health situation evolves, the French and Swedish recommendations also evolve, it is necessary to adapt and to set up the protocol of one level.

We have already considered and prepared this evolution since the beginning of the year and we have been led to implement the pedagogical continuity for the 06 classes of the Lycée level in the annexe associated with a health watch for the staff and the other levels of in-class teaching.

An exceptional Comité Hygiène et Sécurité was held today at 8:30 a.m. in the presence of parents elected to the CE.

I invite you to read it and to apply this protocol by informing your child of the evolution at level 02.

As a reminder :

- Elémentaire: in-class teaching, organization of the canteen times in 3 services per level (cf: protocol).
- Collège: In-class teaching with compulsory wearing of masks in confined spaces and playgrounds (see protocol).
- Lycée: Distance learning until 18/12/2020. Swedish national teaching is maintained with an adapted schedule (about 06 students per exam room). (Cf: protocol) The oral exams will be done digitally.

The canteen service is readapted with 5 canteen services with a limitation of the students' brassage. (Cf: appendix of the sanitary protocol on catering)

Visios for distance learning on the slots of the Timetables will be applied for the 06 Lycée classes.

As a reminder, the communication and transmission tools for distance learning are Pronote and Teams (for the lycée level).

Teachers and staff will maintain communication with families and students to ensure pedagogical continuity and to accompany families during this complex and anxiety-provoking period for all.

Yours sincerely,,

Aurélien LOYSON, Proviseur
